Co

Pr

FLEXIBLE	The welding cell can be flexibly transported, suitable for various scenarios.
VERSATILE	Compatible with domestic and foreign main stream welding machine brands.
MULTIPLE	MIG/MAG, Laser.
REAL-TIME	Welding process parameters can be adjusted in real-time to ensure excellent welding quality.

Interlocking signals between the welding machine and the robot ensure absolute safety.

Modular welding procedure calling, which can be divided into single-pass welding programs, multi-layer, multipass weld seams, and skip welding.

Impo r ing professional parameters from database with one click, and the user teaches weld points only.

Easy to check the teaching path by running procedure without arc sta r ing; suppo r manual wire feeding, wire retraction, and gas feeding.
